

## Shawn M. Luther

107 North Cedar Lane  
Upper Darby, PA 19082  
(484) 632-5178

[Shawnluther99@gmail.com](mailto:Shawnluther99@gmail.com)

### Current Objective:

To obtain a career in Web Development utilizing my skills to create and maintain web applications while learning new skills in the process.

### Job Highlights:

- Intern Jr. Front-End Developer
- Created an Excel Add-in
- Replaced PC hardware
- Created Windows Deletion Utility
- Imaged Windows Computers
- Bagger and Cart Pusher

### Job Experience:

**Global Tax Management** – King of Prussia, PA – 2016 – Present

**TAS Intern - Junior Developer | TAS Analyst**

**Performance Recognition:** Untapped Workforce: Article written in the *Philadelphia Business Journal*

- Developed, maintained, and re-wrote outdated Front-End aspects of the **gtmpower.com** web application using the latest version of the Bootstrap framework. All of my work was managed in the Visual Studio application.
- Created an Excel Add-In which automated a process that took place on the **gtmpower.com** website. I did this using Visual Studio's Windows Forms Application and the C# programming language.
- Performed clerical work around the office recycling, organizing paperwork, and giving a hand around the office wherever I was needed.

**TeamChildren** – Audubon, PA – 2015 – Present

**Volunteer | Computer Technician**

**Performance Recognition:** **Student Volunteer of the Year 2015**

- Created the **Windows Deletion Utility** which later became an add-on to their custom imaging software. The tool essentially automated the process in which after the imaging process the technician would have to go in and manually delete leftover temp accounts from the machine, which my tool ended up doing automatically once the technician ran the imaging software after it was integrated into their software.
- Imaged donated Windows computers using Team Children's custom imaging tool.
- Scanned Windows Machine COA's (Certification of Authenticity) in order for Team Children to collect data which is processed into spreadsheets and sent to Microsoft.
- Quality tested dozens of Windows laptops and desktops after the imaging process. We do this QA process in order to make sure the software installed properly and reinstall anything which may have become corrupted during imaging.
- Replaced and tested several laptops and desktops to assure they have proper hardware and replace a piece of hardware if it is causing the computer to not run properly. In many cases I found myself replacing ram, hard drives, batteries, fans, etc.

**Acme Markets** – Upper Darby, PA – November 17, 2016 – Present

**Associate | Lot Service (Cart Pusher) | Bagger**

**Performance Recognition:** **Employee of the Month | letter from Acme president for outstanding service**

- Bagged groceries for the convenience of Acme customers.
- Cleaned up spills and performed general maintenance around the store.
- Pushed carts back to the store from the cart corrals. I also took care of the lot and did the trash to ensure the store from the outside looked presentable to the customers.

### High School:

The Pathway School – Norristown, PA – 2009 - 2018

**Awards:** Honor roles (First, Second, and High honors)  
Student ambassador (2013 & 2017)  
The Principles award 2018
